

General Chemistry
 Mr. MacGillivray
 Quiz #6:
 Properties and Classification of Matter

Classify each of the following as a compound, mixture, or element.

- 1) M concrete
- 2) C water
- 3) E hydrogen
- 4) M kool-aid dissolved in water

Classify each of the following as a heterogeneous or homogeneous.

- 5) HOMOGENEOUS kool-aid dissolved in water
- 6) HETEROGENEOUS pepperoni pizza
- 7) HOMOGENEOUS air

8) What is the name given to a homogeneous mixture of two substances?

SOLUTION

Identify each of the following as either a physical (P) or chemical (C) change.

- 9) C cooking a steak
- 10) P thawing out a frozen steak
- 11) P boiling water
- 12) C reacting hydrogen and oxygen to make water (H_2O)
- 13) P cutting a piece of rusty metal

Identify each of the following as either a physical (P) or chemical (C) property.

- 14) P color
- 15) P smell

*** Quiz Continued on Back ***

16) The apparatus above is used to (CIRCLE ONE):

- a) separate two substances based on a difference in their boiling points
- b) separate two substances based on a difference in their particle sizes
- c) separate two substances based on a difference in their magnetic properties

17) The process shown above is called (CIRCLE ONE):

- a) Filtration
- b) Crystallization
- c) Distillation
